Taking Sides: Clashing Views on Controversial Bioethical Issues, 10th edition, is a debate-style reader designed to introduce students to controversies in bioethics. The readings, which represent the arguments of leading philosophers and social commentators, reflect a variety of viewpoints and have been selected for their liveliness and substance and because of their value in a debate framework. For each issue, the editor provides a concise introduction and postscript summary. It is this development of critical thinking skills that is the ultimate purpose of each of the volumes in the widely acclaimed Taking Sides program.

Levine, Carol, Ed. The student who has thoughtfully examined opposing viewpoints on an issue should perceive what other position can be occupied on that issue and should learn to carefully consider antithetical viewpoints. The development of this critical approach is the purpose of this book. An introduction, postscript summary, and two articles or published excerpts which delineate the pros and cons of each issue are provided. In this volume, 20 controversial issues are discussed. These cover: (1) reproductive choices; (2) decisions about death; (3) the doctor-patient relationship.
